Oticon Reveal

Core patient narrative

Oticon Reveal is about more than just hearing better. It's about enabling you to feel more like yourself again. When conversations are easier to follow, favorite places sound fuller, and everyday moments feel more natural, you can spend less energy trying to keep up and more time enjoying the people and experiences that matter most. Reveal is designed to give your brain what it needs to make sense of sound – not just clear speech, but the meaningful surrounding sounds around it, from laughter and music to the subtle sounds that make each moment feel alive and complete. Inspired by new insights on BrainHearing™ Reveal helps present speech and meaningful surrounding sounds in an optimal balance so your brain has the information it needs to understand, connect, and stay engaged.

At the heart of Oticon Reveal are two AI systems working together – one helping you hear crystal-clear speech and the other preserving the rich details of your surroundings so listening feels more natural and complete. With clear speech, access to surrounding sounds, and seamless connectivity to the world around you, Oticon Reveal helps bring life back into focus helping you feel present, confident, and fully engaged in all the moments that matter.

Patient benefit

Oticon Reveal™ helps you hear speech and the world around you in a more natural balanced way, so everyday moments feel fuller and easier to enjoy. Oticon Reveal brings you closer to natural hearing.

I am recommending Oticon Reveal because it will give you:

- Clear speech and the sounds around you that give it meaning, together in harmony
- A richer, more natural listening experience, so life feels more complete
- Less straining to hear and understand throughout the day, so you have more energy for what you love
- Confidence to stay engaged without second guessing or missing the moment
- Seamless connectivity to your favorite devices

Feature-to-benefit messaging

Primary features

Dual AI system

Explanation: Oticon Reveal has two AI systems working together to deliver both clear speech and meaningful surrounding sounds in optimal balance. One focuses on speech, while the other helps preserve the sounds that give life context – like the buzz of a favorite restaurant, music, laughter, or the rhythm of the world around you. Working seamlessly together they deliver a richer world of sound and bring you closer to natural hearing.

Tell your patient: Oticon Reveal uses two AI systems that work together to help you hear both people's voices and the meaningful sounds around you in a more natural balance. Working seamlessly together they deliver a richer world of sound and bring you closer to natural hearing.

4D Sensor technology

Explanation: 4D Sensor technology in Oticon Reveal recognizes when listening needs change and adapts accordingly. It monitors head and body movement, conversation activity, and the acoustic environment so it can adjust and personalize support tailored to you based on your listening intentions.

Tell your patient: Oticon Reveal contains sensor technology that understands your listening intentions so it can prioritize and personalize the sounds you need.

Next generation connectivity

Explanation: With Oticon Reveal you can stream music, podcasts, calls, and virtual meetings directly to your hearing aids from compatible iPhone®, iPad®, Mac®, Apple Vision Pro®, and Android™ devices. With a longer range and greater stability, you can stay connected to the people and places you love.

Tell your patient: Oticon Reveal allows you to stream sound directly from their favorite devices: iPhone, iPad, Mac, Apple Vision Pro and Android devices and is ready for future devices. Oticon Reveal provides connectivity without limits for today, tomorrow and the future.

Reveal Optimizer™

Explanation: Reveal Optimizer helps prevent whistling or howling before it starts, supporting stable sound and the amplification you need throughout the day.

Tell your patient: Oticon Reveal has a feedback system that prevents whistling before it starts so you can enjoy stable comfortable sound and get the amplification you need throughout the day without worry.

Wind & Handling Stabilizer 2.0

Explanation: Wind & Handling Stabilizer 2.0 helps reduce wind and handling noise while preserving important speech cues.

Tell your patient: Enjoy clearer, more comfortable listening outdoors and on the go.

Reveal AI Clarifier™

Explanation: Reveal AI Clarifier analyzes the sound environment in real time and adapts to help deliver crystal-clear speech with meaningful surrounding sounds in balance.

Tell your patient: Oticon Reveal adapts to your individual needs based on the environment and what you do. This gives your brain as much sound as possible for a more natural listening experience.

Reveal Amplifier™

Explanation: Reveal Amplifier provides precise, balanced amplification across a wide range of sounds to help create a fuller and richer sound scene.

Tell your patient: The amplification system gives you all the details (both speech and meaningful surrounding sounds) in excellent sound quality.

Discreet Design

Tell your patient: Oticon Reveal is a discreet, lightweight and comfortable hearing aid to wear all day that comes in a variety of colors to match your hair and skin tone.
