Always ready. Always confident.

oticon
life-changing technology

Everything you need for your patients and your clinic

No matter where they are, who they're with, or what they're doing, your patients need hearing aids that are always ready to meet their needs – so they can always connect confidently with the world around them. That's why we're introducing Oticon Verit™.

Oticon Verit is a new, versatile, premium family of three zinc-air hearing aid styles – miniRITE T, miniBTE T 85, and BTE T 105.

With premium audiology, world-class connectivity, powerful zinc-air batteries, and three styles, Oticon Verit helps you match more patients' needs.

Now you can offer a superior hearing experience to your patients, so they're always ready to hear, participate, and connect to the world around them – and always feel confident while doing so.

Oticon Verit offers

All-day performance
with Oticon's always-on,
second-generation AI

Modern
connectivity for a
superior experience

Proven benefits
of BrainHearing™
technology

A full family of zinc-air
styles to support all
your patients' needs

Modern connectivity for a superior experience

Choosing a zinc-air solution shouldn't mean compromising on the latest in seamless connectivity. That's why Oticon Verit offers the latest groundbreaking connectivity features for a superior streaming and call experience.

With Oticon Verit, your patients are always ready to enjoy hands-free calls and experience clear sound when streaming audio from their favorite devices.

Patients can enjoy:

- Hands-free calls and direct streaming on iPhone®, iPad®, Apple Watch®*, Apple Vision Pro™, and Mac® with a Made for iPhone hearing aid
- The latest advances for Android™:
 - Next-generation Bluetooth® LE Audio technology for an all-round better connectivity experience on Android and PC
 - A seamless pairing experience with Fast Pair
 - A new world of audio experiences with Auracast™ technology
- Advantages of Bluetooth LE Audio technology on non-supported devices using the Easy LE Adapter**
- Discreet control with the better-than-ever Oticon Companion app, available right from their smartphone or Apple Watch*

* Oticon Companion app can be used with Apple Watch when the watch is paired to an iPhone.

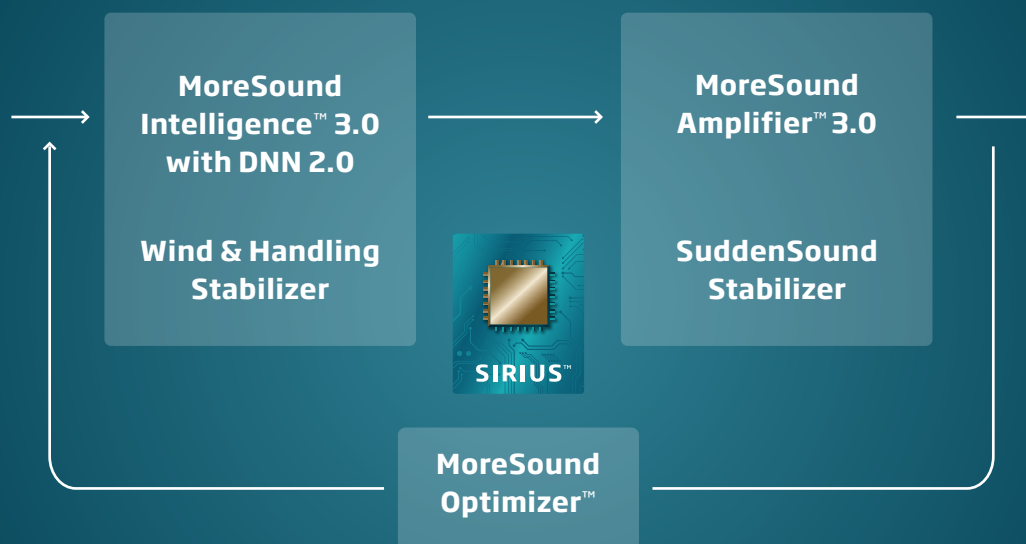

** Most phones and tablets with a 3.5 mm audio jack will not work with the adapter, as many manufacturers choose to route the audio through the audio jack rather than the USB-C.

Empower patients with long lasting, premium performance

Always-on AI for all-day confidence

Oticon Verit is powered by our latest purpose-built Sirius™ platform, and includes our unique always-on, second-generation AI sound processing technology, so your patients get best-in-class support – all day, in any situation. By seamlessly and automatically adapting to the changing listening environment, we ensure that users experience the complete sound scene with more clarity, comfort, and precision than ever before.

Helping the brain work naturally

Like all premium product families from Oticon, Oticon Verit is packed with proven BrainHearing technologies – such as our unique SuddenSound Stabilizer and Wind & Handling Stabilizer – to support the way the brain naturally makes sense of sound. Working together, our three industry-leading MoreSound Technologies process the sound scene in 360° and give access to all meaningful sounds – for better sound quality, clearer speech, and more efficient noise suppression.

Proven benefits from BrainHearing technology

Oticon Verit offers a new level of hearing benefits

Noise reduction that outperforms previous solutions

Thanks to next-generation AI-driven sound processing, Oticon Verit delivers our noise suppression capabilities in any environment. With the unique SuddenSound Stabilizer and Wind & Handling Stabilizer, it also excels at rapidly and optimally balancing sounds that can otherwise be bothersome to hearing aid users.

The second-generation AI is better at preserving the original sound, meaning less loss of cues for both speech and noise. Because of this, the system can suppress unwanted sounds by up to 12 dB in complex environments, which is 2 dB more compared to Oticon Real™ and 3 dB more compared to Oticon Opn S™ zinc-air solutions.

Greater speech clarity enhancement in noise

Understanding speech in noise is the #1 challenge for people with hearing loss.* When tested in a noisy environment, Oticon Verit provides users with enhanced speech clarity,** helping your patients stay confident in any conversation.

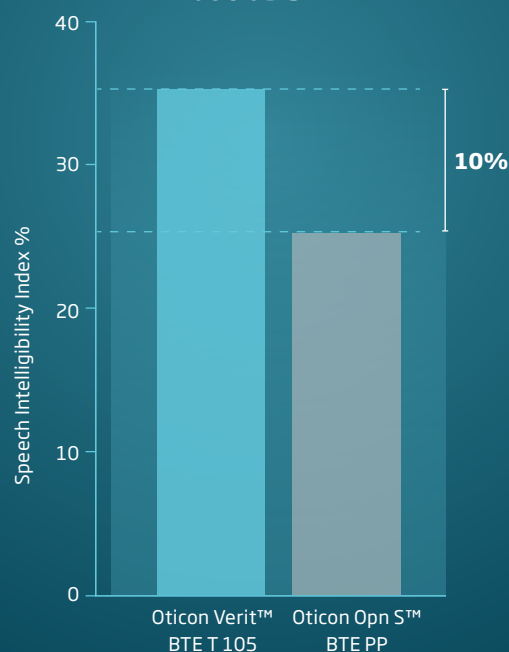

Better access to speech cues

When comparing Speech Intelligibility Index (SII) scores, results show that the Oticon Verit BTE T 105 gives users access to even more speech, providing up to 10% better access to speech cues in complex listening environments than the previous Oticon BTE solution.***

Up to
