ReSound Sensia™

This is what the best sounds like

Find confidence in clarity

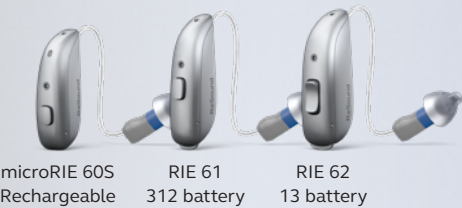

Meet ReSound Sensia – the world's smallest AI-powered hearing aid, built to tackle the biggest challenge for people with hearing loss: hearing in noise.

Driven by our latest deep neural network (DNN) technology, ReSound Sensia works automatically, so you can hear clearly in any environment with less listening effort.

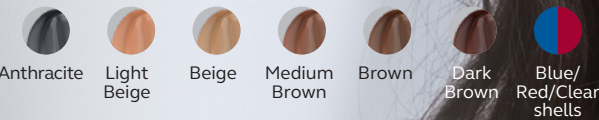

Hear your best – look your best

Great hearing aids do more than deliver great sound. ReSound Sensia comes in different styles and colours, so you can find an option that fits both your hearing needs and your personal taste.

Receiver-In-Ear (RIE)

Custom-made

A revolution in hearing technology

At the heart of ReSound Sensia is a powerful trio of technologies that automatically adapt to your surroundings to deliver a hearing experience that feels more like second nature, without all the second-guessing.

Senses your surroundings

Our leading sound-sensing technology, AcoustIQ™, continuously monitors your surroundings and automatically adjusts sound settings in real time.

Focuses in and tunes out the rest

Hear what you want, simply by turning your head. Four synchronised microphones form a forward-facing beam that helps you focus naturally on the sounds that matter most.

Engages through the noise

Hear conversations more clearly with less effort. Our latest AI-powered denoising technology brings speech to the forefront while making background noise less distracting automatically.

Hearing aids you won't “forget” at home

ReSound Sensia is designed for all-day comfort, all-weather durability, and all-day power, with up to 24 hours of battery life, even while streaming. Charge your rechargeable hearing aids just like any other device.

Clear audio, direct to your ears

ReSound Sensia delivers the clearest streamed sound* experience with Bluetooth® Low Energy (LE) Audio and Auracast™. Find and select Auracast streams intuitively with the Auracast Assistant in the ReSound Smart 3D™ app – no technical expertise required.
