

Beltone
Envision

Illuminate life
with intelligent
hearing technology
and sound

For professionals

Beltone™

Illuminate the future of hearing care

Let clients enjoy life to the fullest with a new intelligent portfolio of RIE styles. Beltone Envision™ gives beautiful clarity to the noise of life. Your clients can embrace what they want to hear with renewed focus.

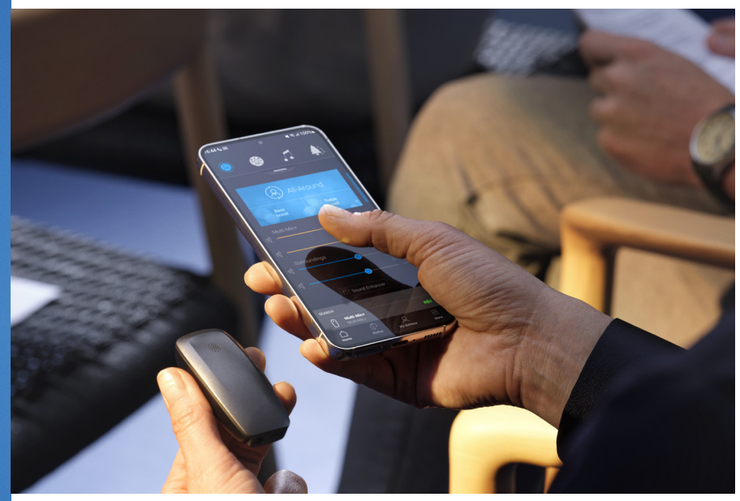

Intelligence Augmented: A human approach to AI
The brain is the most powerful processor and is naturally good at filtering and balancing sounds, but hearing loss reduces this ability. With our human approach to AI, Beltone Envision augments each client's strengths so their brain can continue its natural processing in difficult listening situations.

True Focus for true clarity
Our Deep Neural Network (DNN) chip* spotlights speech signals and contrasts them to noise. Combined with our 4-microphone beamformer, your clients are empowered to decide and focus on what they want to listen to. This is one of the reasons why Beltone Envision is the world's best hearing aid for hearing in noise.[1-4]

Built **for wearing**

- Available in a range of small and discreet RIEs, including the industry's smallest rechargeable RIE and battery-type RIE models[5]
- Exchangeable mic filters for quick in-clinic servicing to keep the hearing aids on the ears of your clients
- All-day battery life even when streaming, so your clients have all the power they need**
- All-weatherproof IP68-rated designs[6]

Auracast **for all**

Offer the clearest Bluetooth® experience ever[7] and the world's first Auracast Assistant for hearing aids[4], available in the Beltone HearMax™ app. Search for available broadcasts and tap to connect to the world of Auracast™ broadcast audio, the TV-Streamer+ and the Multi-Mic+ for amazing streaming and sound.

Download on the App Store | GET IT ON Google Play

Clear **mix-in streaming**

While it's nice to be fully immersed in music or TV audio, it's also essential to stay aware of other sounds, like the doorbell. This feature enables your clients to always hear the sounds around them, while not having to pause the enjoyment.

1. Jespersen (2025)
2. Cui & Groth (2024)
3. Quilter (2021)
4. GN Proprietary data on file
5. GN Proprietary data on file
