

5 reasons to choose Beltone Boost Max S

With severe to profound hearing loss, boosting your clients' world of sound with meaningful improvements is everything. Now, with Beltone Boost™ Max S, we're building on our legacy of what you already love and adding the latest hearing innovations, so your clients don't have to compromise.

1. Boost hearing in noise

Beltone Boost Max S is made for hearing in noise by highlighting speech in front and eliminating distractions without cutting you off from the world. Our latest 4-mic beamforming technology, Clear Focus, offers an impressive:

2.7 dB SNR improvement compared to legacy for those with severe to profound hearing loss[1]

93 % preference for hearing in noise over legacy among Super Power hearing aid users[1]

2. Boost amplification

The frustration of feedback can be an unwanted side effect of more amplification, which can interrupt important moments. That's why Beltone Boost Max S features Feedback Eraser 2, the world's best feedback management system[2] – delivering our fastest elimination of feedback yet without compromising on gain.

3. Boost comfort

The ability to wear hearing aids comfortably throughout the day is not just a convenience – it's essential for quality of life. Beltone Boost Max S is the smallest rechargeable Super Power hearing aid,[3] crafted to sit beautifully on the ear, to minimise pressure and maximise comfort for all-day wear.

4. Boost power

Being able to rely on hearing aids all day is extremely important with severe to profound hearing loss – and lots of personal energy goes into thinking about and locating batteries.

Now your clients can hear with confidence and enjoy the convenience of charging their hearing aids just like other smart devices. Our super-powerful rechargeable hearing aids give all-day battery power with:

28h use on one full change – and 20h when streaming 50% of the time[4]

5. Boost connections

Now your clients can experience the clearest streamed sound and endless opportunities to connect,[5] whether that's at home or in a public space. Beltone Boost Max S is made for Bluetooth® Low Energy (LE) Audio and Auracast™ broadcast audio – and connects now. Use our Auracast Assistant for hearing aids to select audio streams with a simple tap in the Beltone HearMax™ app.
