

5 reasons to choose ReSound Enzo IA

Helping people with severe to profound hearing loss means finding smarter ways to deliver more power, clarity and performance. Even small improvements can make a huge difference. But what if you could gain even more without compromising on anything? We've listened and are bringing you everything you wish for in a Super Power hearing aid.

1. More hearing in noise

Powered by our leading 360 chip, ReSound Enzo™ IA introduces Clear Focus, the industry's most narrow beamformer[1] to spotlight speech in front and eliminate distractions, without cutting you off from the world.

This advanced 4-microphone beamformer delivers impressive results:

2.7 dB SNR improvement compared to legacy for those with severe to profound hearing loss[2]

93% preference for hearing in noise with ReSound Enzo IA compared to our previous generation for Super Power hearing aid users[2]

2. More relief from feedback

The joy of hearing clearly can be overshadowed by the frustration of feedback – those unexpected whistles that interrupt precious moments.

ReSound Enzo IA is equipped with DFS Ultra III, the world's best feedback management system.[3] Our advanced technology works tirelessly to provide the fastest elimination of feedback without compromising on gain.

3. More miniature

The ability to wear hearing aids all day is non-negotiable for your clients. With ReSound Enzo IA, your clients can wear the world's smallest rechargeable Super Power hearing aids[4] with ease all day, every day.

The all-weatherproof design naturally conforms to the shape of the ear to ensure a snug fit, which minimises pressure and maximises comfort for all-day wear.

4. More power

People with severe to profound hearing loss rely on their hearing aids every day – and often spend time worrying about finding the right batteries or unexpectedly running out of power.

It's now possible to get all-day battery without trade-off on functionality.

28h use on one full change – and 20h when streaming 50% of the time[5]

5. More connections

ReSound Enzo IA is the world's first Super Power hearing aid that is made for Bluetooth® Low Energy (LE) Audio and Auracast™ broadcast audio,[5] providing seamless streaming at home and public venues. Connect like never before with the world's first Auracast Assistant for hearing aids[5] – select and hear Auracast streams with a simple tap in the ReSound Smart 3D™ app.
