DANAVOX GN

Danavox Astro Pro

A new dimension of stellar sound and connections

FOR PROFESSIONALS

GN Bringing People Closer

Experience stellar sound with new intelligent solutions that support your natural hearing and connect you to the expanding universe of Auracast™

An astronomical sound difference

Intelligence Augmented
Our brain naturally filters sound to focus on what matters. Hearing loss hinders this ability. That's why we offer Intelligence Augmented, enhancing your brain's natural processing when it needs a little extra help.

Intelligent Focus
We want to push the frontier for hearing in noise, with an out-of-this-world sound experience. Danavox Astro™ Pro is powered by our Deep Neural Network chip, trained on real-life sounds and scenarios, and by activating the Intelligent Focus feature*, it spotlights speech when hearing in noise.

A lineup of stars

Danavox Astro Pro is available in a range of different sizes and colours. We're introducing two new battery styles as well as our rechargeable microRIE – the smallest AI hearing aid in the world.[1]

All-day wear
Your clients can experience great hearing all the time with all-day battery life[2**], an IP68-rated all-weatherproof design[3], and in-clinic exchangeable mic filters.

Auracast for all

Let clients navigate the vast universe of Bluetooth® Low Energy (LE) Audio and Auracast with our new Auracast Assistant for hearing aids, available in the BeMore™ app. It lets users discover streams and enjoy the simplest and clearest Bluetooth experience yet.[4]

Your clients can get even more out of their hearing experience with the Auracast-connected TV-Streamer+ and Multi-Mic+.

GET IT ON Google Play Download on the App Store

Fit faster with Danavox BeMore 2.1

Detect and fit while connected to Bluetooth, meaning that the software can connect to hearing aids that are also connected to a mobile device via Bluetooth.

With just two clicks[5], you can switch technology levels on our Receiver-in-Ear (RIE) devices***, allowing your clients to hear and feel the impact of advanced sound features. The toggling of settings is now clearer, and we've added more resources and a filtering option to our catalogue, so you can easily locate what you need, when you need it.

*Intelligent Focus feature is available in the microRIE style (Tech Level 9)
**Danavox Astro Pro provides 30 hours of use per charge, or 20 hours when streaming 50% of the time
***Flexible demo devices are available as microRIE, miniRIE, RIE 61 and RIE 62 styles

1–3. GN Proprietary data on file
4. Bluetooth SIG
5. GN Proprietary data on file
